Education

Indian Institute of Information Technology, Kota (IIITK)

Nov 2022 – May 2026

B.Tech in Computer Science & Engineering

Rajasthan, India

Work Experience

AirDawg Labs

May 2026 – Present

AI/ML Engineer Intern

Remote, India

- Configured, developed, and maintained **Python** LLM agent evaluation services and **Dockerized** pipelines for production-quality benchmark runs, release gating, and continuous quality checks.
- Applied software engineering practices across requirements analysis, **pytest** design, documentation, and support to minimize defects and inconsistent Claude/GPT evaluation outcomes.
- Audited instruction clarity, edge cases, and test coverage with research and engineering stakeholders so benchmarks stay fair, reproducible, and acceptance-aligned.
- Leveraged **Generative AI** / **agentic tools** (Claude, GPT) for debugging, test review, and productivity; helped lift task acceptance to about **85%** via clearer specs and validation.

Xelron AI

Mar 2026 – Present

Software Development Engineer Intern

Remote, Bangalore

- Engineered end-to-end full-stack pipelines in **Python** and **TypeScript** processing **10,000+** GitHub PRs, with **RESTful** / **Web APIs** and backend validation for automated model evaluation.
- Designed AI-assisted validation features across the stack, improving system reasoning accuracy by about **25%** while keeping services maintainable with OOP and clear interfaces.
- Built **CI/CD** workflows with **GitHub Actions** and **Docker** for build, release, and cloud deployment automation, cutting release cycles by about **20%**.
- Delivered across parallel projects with stakeholder collaboration, **Agile/Scrum**, code review, and quality checks for reliable production delivery with minimal supervision.

Indian Institute of Information Technology, Kota

Jan 2025 – Apr 2025

Full Stack Developer Intern

Kota, Rajasthan

- Architected the official institute web app on modular **React**, **Node.js**, and **TypeScript**, improving maintainability by about **40%** via cleaner modules and reusable components.
- Integrated **Redis** caching on high-traffic **REST APIs** with relational data access, decreasing server latency by about **40%** and boosting throughput under concurrent load.
- Implemented **TDD** and **JWT** authentication for API security and data integrity, increasing mobile user retention by about **15%** through more reliable auth flows.
- Owned features end-to-end through analysis, design, documentation, maintenance, and support in a fast-paced Agile team with strong stakeholder collaboration.

Projects

FitFrame | [Live](#) | [GitHub](#) | *Next.js, FastAPI, WebSockets, Docker, PostgreSQL*

Nov 2025 – Feb 2026

- Built a responsive full-stack app with **Next.js** and **FastAPI**; **REST** / **Web APIs** handling **500+** concurrent requests across devices.
- Engineered **WebSockets** at **30+ FPS**, RTT under **50ms**, frame drops below **2%**; **Docker** + **PostgreSQL** with OOP and design patterns.

Medi-Core | [Live](#) | [GitHub](#) | *Python, LangChain, Pinecone, RAG, LLM Agents*

Jan 2026 – Mar 2026

- Deployed a backend **microservice** with **Pinecone** and **LangChain** RAG pipelines, fetching context in under **200ms** for grounded LLM responses.
- Built data-ingestion workflows for unstructured files with strict validation, improving retrieval accuracy by about **60%** for reliable maintenance and support.

Technical Skills

Languages: C/C++, Python, Java, JavaScript, TypeScript, SQL

Backend: Node.js, FastAPI, REST APIs, WebAPI, .NET Core, Microservices

Frontend: HTML, CSS, React, Next.js, Responsive Design

Cloud & DevOps: AWS, Docker, CI/CD Pipelines, GitHub Actions, Azure

Databases: MySQL, PostgreSQL, MS SQL Server

Tools: Git, GitHub, Linux, Agile/Scrum, Design Patterns, Generative AI
